EXPERIENCE

June 2020 - PRESENT

Self taught full stack developer

PROJECTS

My web portfolio — Detail

I used HTML/ CSS and Django to build my web and i thought since i am also into AWS ,i should use Elastic Beanstalk to deploy it instead of traditional hosting.

Web Scraper — Detail

Since i am looking for a job, i thought it will be best to automate the whole process using a bot which will scrape the web for me. I used Python and a framework called a beautiful soup. I learned a lot from it.

Digital Invoice — Detail

I used Tkinter and Python to develop a GUI to help me solve an old system of paper invoicing at my current work.

Netflix Clone — Detail

I thought I should use React to do a Netflix kinda app.

SKILLS

Python

Django

Javascript

React

HTML/CSS

AWS

Certification

AWS Solution Architect
AWS Developer Associate
AWS Sysops
